## Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

### Discharge Planning Initiated

System detects patient eligibility for discharge based on treatment progress milestones or clinical team request. Patient record is flagged for discharge planning workflow.

2

 ACTION

### Gather Multidisciplinary Assessments

System automatically pulls latest clinical assessments, therapy notes, and medication records from all care team members. Compiles comprehensive patient status report for discharge review.

Epic EHR

TherapyNotes

3

 DECISION

### Evaluate Discharge Readiness

System analyzes assessment data against discharge criteria including treatment goal completion, stable medication regimen, and risk assessment scores. Routes to appropriate discharge pathway based on readiness level.

Epic EHR

TherapyNotes

4

 ACTION

### Generate Discharge Plan

System creates personalized discharge plan including medication instructions, follow-up appointments, recovery resources, and emergency contacts. Plan is routed to clinical team for review and approval.

Epic EHR

Kipu Health

5

 ACTION

### Schedule Follow-up Services

System automatically schedules outpatient therapy sessions, medication management appointments, and support group referrals based on discharge plan recommendations. Sends appointment confirmations to patient and providers.

TheraNest

Epic EHR

6

 ACTION

### Submit Compliance Documentation

System generates required regulatory reports and insurance documentation for discharge. Submits forms to appropriate agencies and payers while maintaining HIPAA compliance.

SimpleReports

Epic EHR

7

 OUTPUT

### Deliver Discharge Package

System compiles final discharge documentation, medication lists, and follow-up instructions into patient portal. Sends secure notifications to patient, family contacts, and continuing care providers.
