Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

Job completion notification received

Workflow activates when cleaning crew marks a job as complete in the scheduling system. System retrieves job details including location, services performed, and crew information.

ServiceTitan

Swept

2

 ACTION

Generate location-specific inspection checklist

AI system creates a customized quality checklist based on the facility type, contracted services, and historical quality issues. Checklist is sent to designated inspector's mobile device.

CleanGuru

ZenMaid

3

 ACTION

Capture inspection results digitally

Inspector completes the checklist using mobile app, capturing photos, ratings, and notes for each inspection point. Data is automatically timestamped and geo-tagged.

Housecall Pro

ServiceTitan

4

 DECISION

Evaluate inspection pass/fail status

System analyzes inspection scores against predefined quality thresholds and client-specific standards. Routes workflow based on whether inspection meets acceptable quality levels.

CleanGuru

5

Trigger remediation workflow

For failed inspections, system automatically creates remediation work orders and notifies crew supervisors of specific deficiencies requiring immediate attention. Timeline for re-inspection is established.

Swept

Kickserv

6

⚙️ ACTION

Update client records and inventory

Inspection results are logged in client history and any supply usage or equipment issues noted during inspection trigger inventory updates. Quality trends are tracked for reporting.

ServiceTitan

ZenMaid

7

📄 OUTPUT

Generate quality compliance report

System produces detailed quality report with photos, scores, and any corrective actions taken. Report is automatically sent to client and filed in quality management database.

CleanGuru

Housecall Pro

Outputs

- Digital quality inspection report with photos and scores
- Automated remediation work orders for failed inspections
- Updated client quality history and trending data

Key Metrics

- Inspection pass rate percentage
- Average inspection completion time
- Client satisfaction scores post-inspection
