WORKFLOW TRIGGER

Daily inventory scan detects supply levels below minimum thresholds

Visual Flow

Each node represents an automated step. Connections show how data and decisions move through the workflow.

Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

Check inventory levels daily

Automated system scans current stock levels for cleaning solvents, hangers, plastic covers, and other supplies. Compares current quantities against predefined minimum thresholds.

Garment Management System

Spot Business Systems

2

DECISION

Evaluate reorder requirements

System determines which items have fallen below reorder points and calculates optimal reorder quantities based on usage patterns. Branches workflow based on urgency level.

Garment Management System

3

ACTION

Generate purchase orders automatically

Creates purchase orders for identified items and routes them to approved suppliers. Includes preferred vendor selection based on pricing and delivery terms.

Spot Business Systems

QuickBooks for dry cleaners

4

Update financial records

Posts pending purchase order amounts to accounts payable and updates budget tracking. Integrates seamlessly with existing accounting workflows.

QuickBooks for dry cleaners

5

⚙️ ACTION

Schedule delivery coordination

Coordinates delivery schedules with suppliers and blocks appropriate receiving time slots. Sends alerts to staff about incoming shipments.

Spot Business Systems

6

⚙️ ACTION

Update inventory projections

Adjusts inventory forecasts based on pending orders and updates reorder point calculations. Learns from usage patterns to optimize future ordering.

Garment Management System

7

📄 OUTPUT

Send management reports

Generates comprehensive inventory status reports and cost summaries for management review. Includes recommendations for supplier performance and cost optimization.

Spot Business Systems

QuickBooks for dry cleaners

Outputs

- Automated purchase orders sent to suppliers
- Updated inventory projections and reorder points
- Management dashboard with supply cost analysis

Key Metrics

- Inventory turnover rate
- Days without stockouts
- Supply cost per garment processed

Tools & Integrations

- Garment Management System
- Spot Business Systems
- QuickBooks for dry cleaners
