Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

Event Details Finalized

Event requirements, timeline, and staffing needs are confirmed in the event management platform. System triggers automated staff scheduling process.

Cvent

Planning Pod

2

 ACTION

Analyze Staffing Requirements

AI extracts required roles, skill sets, shift times, and headcount from event specifications. System maps staffing needs against event timeline and venue layout.

Planning Pod

Social Tables

3

 ACTION

Check Staff Availability

System queries staff database for availability, certifications, and current workload during event timeframe. Generates pool of qualified candidates for each role.

Planning Pod

4

Evaluate Staffing Coverage

AI determines if available staff can fulfill all event requirements. Routes to automated assignment if adequate coverage exists, or escalates to manual review if understaffed.

Planning Pod

5

 ACTION

Optimize Staff Assignments

Machine learning algorithm assigns staff to roles based on skills match, preference history, and workload balancing. Creates optimized schedule minimizing conflicts and travel time.

Planning Pod

6

 ACTION

Send Task Briefings

System generates personalized task assignments with venue maps, contact lists, and specific responsibilities for each staff member. Automated notifications sent via preferred communication channels.

Planning Pod

Whova

7

 OUT PUT

Deliver Scheduling Dashboard

Complete staffing schedule with role assignments, contact information, and real-time status tracking is published to event management dashboard for supervisor oversight.

Outputs

- Optimized staff schedule with role assignments
- Personalized task briefings sent to each team member
- Real-time staffing dashboard for event supervisors

Key Metrics

- Staff scheduling time reduction percentage
- Schedule conflict rate
- Staff satisfaction scores with assignments

Tools & Integrations

- Cvent
- Planning Pod
- Social Tables
- Whova
