## Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

**Burial service selection confirmed**

Family selects burial option and provides cemetery preferences during funeral arrangement meeting. System captures burial requirements and family contact information.

FuneralTech software

2

 ACTION

## Check cemetery plot availability

System queries selected cemetery's plot management database to verify availability of plots matching family preferences and burial requirements. Retrieves available plot locations and pricing information.

FuneralTech software

3

 DECISION

## Evaluate plot availability status

System determines if preferred plots are available or if alternative options need to be presented to the family. Routes workflow based on availability results.

Cemetery plot management software

4

 ACTION

## Reserve selected burial plot

System automatically reserves the chosen plot and updates cemetery records with burial details. Generates plot reservation confirmation and updates funeral service timeline.

Funeral home accounting systems

7

📄 OUTPUT

### Deliver coordination confirmation

System sends complete burial arrangement confirmation to family with plot details, service timeline, and required documentation. Notifies all stakeholders of finalized arrangements.

FuneralTech software

## Outputs

- Reserved cemetery plot with confirmed location
- Complete burial documentation package
- Coordinated burial timeline with all stakeholders

## Key Metrics

- Plot reservation completion time
- Documentation accuracy rate
- Family satisfaction with coordination process

## Tools & Integrations

- FuneralTech software
- Cemetery plot management software
- Funeral home accounting systems
