## WORKFLOW TRIGGER

Family member requests grief counseling services through funeral home intake or online portal

## Visual Flow

Each node represents an automated step. Connections show how data and decisions move through the workflow.

## Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

### Grief counseling request received

A family member submits a grief counseling request through the funeral home's client portal or during initial service consultation. Request includes

family details, preferred timing, and specific counseling needs.

## AI Business OS

FuneralTech software

2

 ACTION

### Retrieve family service records

System automatically pulls the family's existing funeral service records to understand their situation and previous interactions. This ensures counselors have proper context before the appointment.

FuneralTech software

Mortuary management systems

3

 DECISION

### Assess counseling urgency level

System evaluates request details and family circumstances to determine if immediate crisis intervention is needed or standard scheduling applies. Urgent cases are fast-tracked to available counselors.

Grief counseling platforms

4

 ACTION

### Match counselor and schedule

System matches family with appropriate grief counselor based on specialization and availability, then automatically schedules the appointment. Confirmation details are prepared for family notification.

Grief counseling platforms

5

 ACTION

### Send appointment confirmation

Automated, compassionate communication is sent to family members with appointment details, counselor information, and preparation guidance. Multiple contact methods are used based on family preferences.

FuneralTech software

6

OUT PUT

## Update service records

All grief counseling appointment details are recorded in the family's service file and counselor schedule is updated. Follow-up reminders are automatically scheduled.
