WORKFLOW TRIGGER

Daily scheduled time (6:00 AM) to compile previous day's performance data

Visual Flow

Each node represents an automated step. Connections show how data and decisions move through the workflow.

Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

Daily performance data collection

Automated trigger fires at 6:00 AM daily to begin collecting previous day's operational data from all locations. This ensures consistent timing for daily performance analysis across the entire chain.

SpeedQueen Connect

Huebsch Command

2

 ACTION

Aggregate multi-location machine data

Pulls machine utilization rates, cycle counts, revenue per machine, and downtime hours from each location's equipment monitoring systems. Data is normalized and consolidated into a unified dataset for analysis.

SpeedQueen Connect

Huebsch Command

Dexter Connect

3

 ACTION

Compile financial and operational metrics

Retrieves payment transaction data, inventory consumption levels, and operational costs from each location. Calculates key performance indicators like revenue per square foot and profit margins per site.

LaundryPay

Wash Tracker

4

 DECISION

Identify performance anomalies

Analyzes collected data to detect locations with performance metrics outside normal ranges (revenue drops >15%, utilization <70%, or maintenance costs >threshold). Routes flagged locations for immediate attention while standard performers continue to summary reporting.

5

 ACTION

Generate location ranking reports

Creates comprehensive performance rankings comparing all locations across revenue, efficiency, customer satisfaction, and profitability metrics. Identifies best practices from top performers and improvement opportunities for underperforming sites.

Wash Tracker

Continental Laundry Systems

6

 ACTION

Create actionable recommendations

Generates specific improvement recommendations for each location based on performance gaps and successful practices from high-performing sites. Includes equipment optimization suggestions, staffing adjustments, and maintenance priorities.

SpeedQueen Connect

Continental Laundry Systems

7

 OUTPUT

Distribute performance dashboard

Sends automated daily performance reports to regional managers and corporate executives via email and updates centralized dashboard. Includes executive summary, location rankings, and priority action items requiring immediate attention.

Wash Tracker

Outputs

- Daily multi-location performance ranking report
- Location-specific improvement recommendations
- Executive performance dashboard with KPIs
- Underperforming location alert notifications

Key Metrics

- Revenue per location variance
- Equipment utilization rates across sites
- Average profit margin by location
- Customer satisfaction scores by site

Tools & Integrations

- SpeedQueen Connect
- Huebsch Command
- Dexter Connect
- LaundryPay

- Wash Tracker
