WORKFLOW TRIGGER

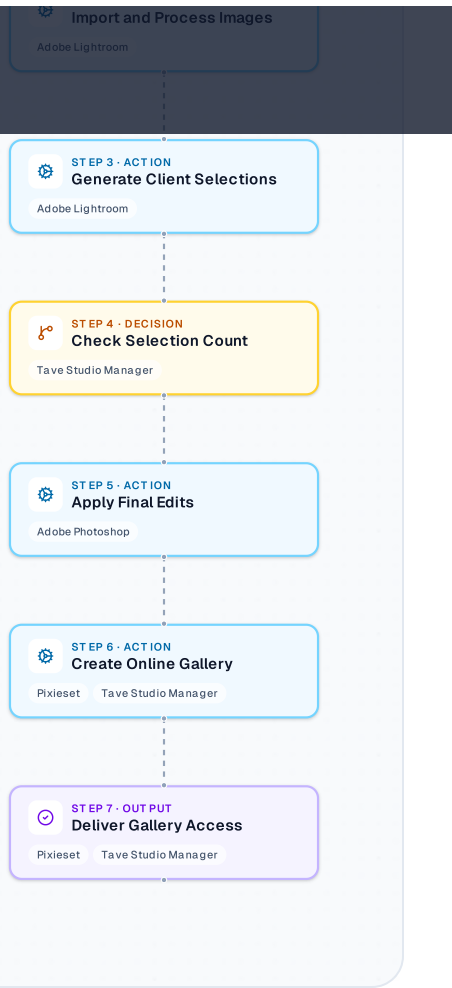

Photographer uploads session photos to studio management system after completing a client shoot

Visual Flow

Each node represents an automated step. Connections show how data and decisions move through the workflow.

Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

Session Photos Uploaded

Photographer uploads raw session images to the studio management system, triggering the automated gallery creation process. The system detects new uploads and initiates workflow processing.

2

 ACTION

Import and Process Images

Raw images are automatically imported into Lightroom for initial processing and organization. Basic exposure, color correction, and cropping adjustments are applied using AI-assisted presets.

Adobe Lightroom

3

 ACTION

Generate Client Selections

AI analyzes processed images for quality, composition, and facial expressions to automatically curate the best shots. A predetermined number of top images are selected based on session package requirements.

Adobe Lightroom

4

 DECISION

Check Selection Count

System verifies if the curated selection meets the contracted delivery count for the client's package. If insufficient, additional images are automatically selected or flagged for manual review.

Tave Studio Manager

5

 ACTION

Apply Final Edits

Selected images receive final retouching and style adjustments in Photoshop using automated actions. Images are then exported in web and high-resolution formats for gallery display and client downloads.

Adobe Photoshop

6

 ACTION

Create Online Gallery

Processed images are uploaded to Pixieset with client information, session details, and viewing permissions. Gallery settings are configured based on client package terms and download permissions.

Pixieset

Tave Studio Manager

7

 OUTPUT

Deliver Gallery Access

Client receives automated email notification with secure gallery link, viewing instructions, and download options. Gallery access details are logged in the studio management system for tracking.

Pixieset

Tave Studio Manager

Outputs

- Curated online photo gallery

- Client notification email with access link

AI Business OS

- Updated client project status in studio system

Key Metrics

- Gallery delivery time
- Client download rate
- Image selection accuracy

Tools & Integrations

- Tave Studio Manager
- Adobe Lightroom
- Adobe Photoshop
- Pixieset

AI Business OS

Actionable AI implementation strategies for business leaders ready to transform their operations.
