WORKFLOW TRIGGER

Scheduled reporting period ends (daily, weekly, or monthly based on client contract)

Visual Flow

Each node represents an automated step. Connections show how data and decisions move through the workflow.

Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

Initiate Reporting Period

The workflow automatically triggers at the end of a client's specified reporting period. The system identifies which clients require reports based on their contract schedules.

2

 ACTION

Collect Security Incident Data

Gathers all security incidents, alarms, access control events, and patrol logs from the reporting period. Data is aggregated from multiple security management systems.

Genetec Security Center

AMAG Symmetry

Lenel OnGuard

3

 ACTION

Analyze Surveillance Footage

AI-powered video analytics review flagged incidents and generate video clips with timestamps. The system identifies patterns and categorizes security events automatically.

Milestone XProtect

Avigilon Control Center

Bosch Video Management System

4

 DECISION

Assess Incident Severity

Evaluates each security incident based on predefined risk levels and client-specific criteria. High-priority incidents are flagged for immediate executive summary inclusion.

Genetec Security Center

5

 ACTION

Generate Analytics Dashboard

AI Business OS

Creates customized charts, heat maps, and trend analysis based on client preferences and contract requirements. Includes comparative data from previous reporting periods.

Genetec Security Center

Avigilon Control Center

6

 ACTION

Compile Comprehensive Report

Assembles executive summary, detailed incident reports, video evidence, compliance documentation, and recommendations into client-branded PDF format. Report includes patrol verification and response time metrics.

Genetec Security Center

7

 OUTPUT

Deliver Client Report

Automatically sends the completed security report via encrypted email to designated client contacts. Portal access credentials are provided for interactive dashboard viewing.

Genetec Security Center

Outputs

- Automated client security report PDF

AI Business OS

- Interactive analytics dashboard access

Executive Summary with key metrics

- Video evidence compilation

Key Metrics

- Report generation time
- Client satisfaction scores
- Incident response time averages
- Compliance adherence percentage

Tools & Integrations

- Genetec Security Center
- AMAG Symmetry
- Lenel OnGuard
- Milestone XProtect
- Avigilon Control Center
- Bosch Video Management System

AI Business OS

AI Business OS

Actionable AI implementation strategies for business leaders ready to transform their operations.
