

Customer proofing and sign-off processes

Automates customer design approval by generating proofs, collecting feedback, tracking revisions, and securing final sign-off before production begins. Reduces approval cycles from days to hours while maintaining detailed approval records.

Step-by-Step Breakdown

Detailed explanation of each automated stage in the workflow.

1

⚡ TRIGGER

Design File Received

Initial design file is uploaded to the job management system from design team. System captures job details, customer information, and design specifications.

2

 ACTION

Generate Customer Proof

System automatically creates high-resolution proof renderings with mockups and material specifications. Generates multiple views and installation context images.

SignLab

Adobe Illustrator

3

 ACTION

Send Proof Package

Automated email sends proof package to customer with interactive approval interface. Includes pricing, timeline, and markup tools for feedback.

ShopVox

Cyrious Control

4

 DECISION

Evaluate Customer Response

System checks if customer approved, requested changes, or requires follow-up. Routes workflow based on response type and urgency level.

ShopVox

Cyrious Control

5

 ACTION

Process Design Revisions

If changes requested, system creates revision task for design team and tracks version history. Updates proof with revision markers and change log.

6

 ACTION

Finalize Production Package

Upon approval, system generates production-ready files with cut paths, color specifications, and material requirements. Creates work orders and schedules production.

7

 OUT PUT

Release to Production

Approved design package is automatically released to production queue with all specifications and customer sign-off documentation. Production team receives notification and file access.

Outputs

- Production-ready design files
- Customer approval documentation
- Automated production work orders

Key Metrics

- Proof approval cycle time
- Revision request frequency
- Customer satisfaction scores

Tools & Integrations

- ShopVox
- Cyrious Control
- FlexiSIGN
- SignLab
- Adobe Illustrator
- CorelDRAW
